RELEVANT EXPERIENCE

Web Development Immersive Program Student
General Assembly | San Francisco, CA | Oct 2016 - Jan 2017
• Built fully functional applications utilizing Ruby, Rails, JavaScript/jQuery,
HTML, and CSS with working knowledge in many other languages,
frameworks and web development processes within 12 weeks.

Projects:
Welcome Wisdom - welcomewisdom.heroku.com
• Welcome Wisdom is a web application that offers volunteering
opportunities to individuals who care for senior wellness, and connects
volunteers with seniors in need of company. I built this app using Ruby on
Rails, PostgreSQL, Materialize, Action Mailer, and Paperclip.

Vagabond - arcane-journey-93971.herokuapp.com
• Vagabond is a web application that users can post reviews on cities
they've visited, and also comment on other people's reviews. This was a
group project I contributed mainly on back-end development.

Mapp - quiet-anchorage-32697.herokuapp.com
• Mapp is a web application that users can share their favorite locations
around the world. This was a group project, we used Ruby on Rails,
PostgreSQL, Materialize, and Google APIs. I contributed towards mainly
front-end development and building routes to display data.
